### Step 1 — Niche and Targeting Configuration

Users define their service niche and target industry. The AI is configured to surface businesses matching these parameters — ensuring relevance and conversion potential.

### Step 2 — Automated Prospect Discovery

The AI client finder scans digital channels continuously, identifying and qualifying prospects based on buyer intent signals. No manual research required.

### Step 3 — Outreach Deployment

Optimized messaging scripts are deployed automatically to qualified prospects. Scripts are designed around proven conversion psychology — not generic cold pitches.

### Step 4 — Funnel Conversion

Responding prospects enter pre-built funnels that handle education, trust-building, and call-to-action. This is where the Done-For-You advantage is most visible.

### Step 5 — Monetization

Converted prospects become paying clients, lead buyers, or affiliate referrals depending on the income model chosen. The system supports all paths simultaneously.
