## What Is Belbien (Zolpidem) Used For?

Belbien (Zolpidem) is a **non-benzodiazepine hypnotic medication** primarily used to treat short-term **sleep disorders**, such as difficulty falling or staying asleep. It acts on the brain's GABA receptors to calm activity, allowing the body to naturally fall into restful sleep cycles.

Many adults prefer Belbien for its quick onset and minimal grogginess the next morning, making it a **top choice for effective sleep support**.
