---

What Is Tramadol 100mg? (Generic Name: Tramadol Hydrochloride)

Tramadol Hydrochloride is a prescription pain medication designed to treat **moderate to moderately severe pain**. It belongs to the class of medications known as **opioid analgesics**, which act on the central nervous system to block pain signals and provide calm, sustained relief.

This medication is often prescribed to help manage pain after surgery, injury, or chronic conditions like arthritis, neuropathy, or back pain. Tramadol 100mg is favored for its **dual-action formula**, combining opioid and serotonin-norepinephrine reuptake inhibition, helping users experience comfort without extreme sedation.

---

### Why Choose to Buy Tramadol 100mg Online from Primedrugstores.com?
