## How Phentermine Works

Phentermine (generic **Adipex-P**) belongs to a class of drugs known as **sympathomimetic amines**. It helps suppress appetite by increasing levels of neurotransmitters like norepinephrine in the brain, leading to reduced hunger signals. It's typically recommended for individuals with a **BMI over 30**, or **over 27 with health risks** such as high blood pressure or diabetes.

### Uses:

- Assists in **weight reduction** programs
- Helps **control overeating**
- Improves **energy and alertness** during calorie restriction

*Always use Phentermine under professional supervision and follow recommended dosages.*
