## **What Is Farmapram?**

Farmapram is the **brand name for Alprazolam**, a widely used medication from the benzodiazepine class. It helps reduce the excessive brain activity that triggers anxiety, stress, and panic disorders. Doctors often recommend Farmapram for individuals struggling with generalized anxiety disorder (GAD), panic attacks, or insomnia caused by tension.

The **generic form, Alprazolam**, acts on neurotransmitters to produce a calming effect. Its fast onset makes it suitable for those who need quick anxiety relief.
